

Aluminum Reciprocating Air Compressors 2-10 hp

Ingersoll Rand aluminum reciprocating air compressors leverage an innovative design to provide superb performance and reliability for your professional or industrial applications that require compressed air. Robust construction ensures long life and ease of maintenance. With a wide range of available configurations and options, you can create a compressed air system to meet your needs – whether you need ultra quiet operation or heavy duty performance.

Features

- Reliable Operation: Robust components ensure your compressor is ready to work when you are
- Innovative Design: State-of-the-art aluminum design is lightweight and easy to install
- Ease of Maintenance: Designed with serviceability in mind to provide easy access to user-maintained components
- Flexible Design Options: Multiple
 configurations and rich options allow you to
 create a compressed air system that meets
 your unique needs, including low noise, high
 performance, or petrol driven models.
